

**GAIL and Cummins sign MoU for collaboration**

GAIL (India) Ltd, a Maharatna CPSE under MoPNG and Accelerator™ by Cummins, the zero-emissions business segment of Cummins Inc (NYSE: CMI), signed a Memorandum of Understanding (MoU) to collaborate broadly in sustainable, green energy and energy transition technologies in India. The MoU was signed at the India Energy Week 2025.

## GAIL and Cummins sign MoU for collaboration on clean energy

**G**AIL (India) Limited and Accelera by Cummins, the zero-emissions business segment of Cummins Inc, have signed a MoU to collaborate broadly in sustainable, green energy and energy transition technologies in India. The MoU was signed on Wednesday at the India Energy Week 2025. The collaboration will leverage Accelera's expertise in New Energy businesses and GAIL's established Natural Gas infrastructure to explore opportunities in New Energy Businesses such as hydrogen production, blending, transportation and storage. GAIL has already advanced its Scope 1 and Scope 2 "Net Zero" Targets from 2040 to 2035. GAIL which always has been promoting clean energy, commissioned a 10 MW Green Hydrogen unit at its plant at Vijaipur in April 2024. The Electrolyser was of Accelera™ by Cummins make. GAIL, through its JV M/s Avantika, also conducted pilot scale studies in Indore CGD network by blending 2 % Hydrogen in CNG/ PNG and later scaled up to 5 % in PNG network. As part of energy transition, GAIL has already set up 5 TPD CBG plant at Ranchi and is on course to set up 26 plants in the next 3-4 years.
